

# Like many parents of younger children, you may be worried about keeping your kids safe from **COVID-19**.

The good news: the COVID-19 vaccine is now available for kids ages 5 and up. **Experts agree it's the best way to protect against COVID-19 and prevent kids from getting seriously ill.**

It's natural to have questions about the vaccine and your child. Here are some facts:

- The Pfizer vaccine is approved for kids ages 5 and up.
- It was proven to be 91% effective at preventing infections in kids.
- The COVID-19 vaccines are rigorously tested.
- The Pfizer clinical trials included 2,200 kids aged 5-11.
